

EVENT: ****Complete Rider Numbers Sheet**** DATE: _____
 ORGANIZER: _____ PROMOTING CLUB: _____

LOOK UP TABLE: RELATIVE RATIOS

Prize Calculators & Look Up Tables are based upon these percentages

These ratios were selected with the following aims:

1. To give a reasonable distribution of funds between prizewinners in a given race.
2. To give useful guidance to organizers.
3. To take into account that the prize fund varies widely between events, depending on factors such as venue hire (e.g. £0-£500) and infrastructure costs (toilet hire, tape, stakes etc.).
4. To ring-fence a proportion of the total prize fund that is representative of the number of riders in each category.
5. To introduce a system where, within each category, each rider contributes a proportion of their entry fee to a fund to supply those prizes that are mandated by BC, and thus riders may only compete for prizes to which they have contributed.
6. To minimize, and eliminate wherever possible, the subsidizing of one category's prizes by another group of riders ineligible for those prizes, whilst maintaining a reasonable minimum prize value.
7. To minimize the risk of an organiser being out-of-pocket.

No. Riders in Category	PRIZES
